FOX CONCEPT STANDS

FOX is a high technology brand offering a range of universal products.
Designed to fit all applications and leading power tool brands

DIAMOND WHEELS

Only the hardness of diamond allows dry cutting of stone, concrete and other building materials. Diamond-edged blades cut extremely fast and will last atleast a hundred times longer than traditional bonded abrasive discs.

- Continuous rim blades - ideal for fine cutting of the hardest material such as Marble, Ceramic or Tile.
 - Segmented blades - a general purpose blade for cutting Stone, Concrete, Thermal Block etc.
- Turbo Rim blades - ideal for fast, consistent cutting depth in Universal Materials. Hard Clinker, Stone, Ceramic, Granite etc.

SANDING BELTS

Belt sanders are multiuse tools. They are commonly used for trimming to a scribed line, sanding very rough surfaces, leveling surfaces and freehand rounding and shaping. Because they have a lot of power and can handle coarse grits, they excel at the rapid removal of wood.

Sanding Belt - Powerfile - Aluminium Oxide

SANDING BELTS

Belt sanders are multiuse tools. They are commonly used for trimming to a scribed line, sanding very rough surfaces, leveling surfaces and freehand rounding and shaping. Because they have a lot of power and can handle coarse grits, they excel at the rapid removal of wood.

TIPS

Belt sanders excel at the rapid removal of wood, making them the best handheld power tool for leveling and smoothing rough boards. Start at an angle to the grain for aggressive leveling, then finish with the grain. Eighty-grit is good for starting, then switch to 120-grit.

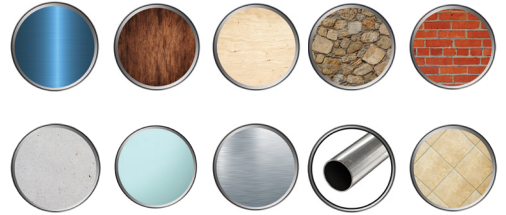

Sanding Disc - Resin Fibre

CUTTING DISKS

Belt sanders are multiuse tools. They are commonly used for trimming to a scribed line (photo), sanding very rough surfaces, leveling surfaces (like a replacement board in a hardwood floor) and freehand rounding and shaping. Because they have a lot of power and can handle coarse grits, they excel at the rapid removal of wood.
