# HOW TO CHOOSE THE RIGHT LAMP

LED lighting solutions come in all shapes and sizes. Choose the right lamp for household and business use. There are many benefits of using the right lighting in office and home spaces. Follow these 5 easy steps to choose the right LED lamp.

**LITEMATE** offers high quality LED lighting perfect to illuminate both businesses and homes alike. We offer a wide range of LED lightbulbs for all your lighting solutions. **LITEMATE** is the ideal cost-effective lighting solution.

**LITEMATE** offers 85% energy saving with a lifespan of 50 000 hours. Available for indoor and exterior use.

Our range is RoHS approved and includes a 5-year warranty.

Ever changing technology in LED lighting is paving the way to new and exciting opportunities. Litemate SMARTHOME WIFI LED can enhance each room in your home or office. Create lighting pre-sets for special mood lighting. All of these lighting pre-sets can be instantly and remotely activated using smart Android and IOS devices greatly increasing home security.

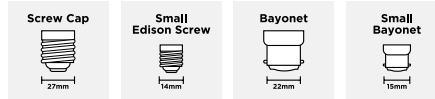

Other Litemate SMARTHOME LED Lamps include 3 in 1 Colour Changing, Dimmable, Rechargeable, Motion Sensor Activation and Day/Night Sensor Activation Technology.

Our lamps LED lamps offer high lumen output, energy efficiencies of up to 90% with a 3 year 30 000 hour lifespan and warranty. Our LED lamps are also environmentally friendly, Rohs compliant and contain no mercury, lead or other hazardous materials.

## DO YOU NEED A NEW LIGHTBULB?

### STEP 1 Know what **fit** you need

#### Bulb Fitting Guide

### STEP 2 For brightness pick **Lumens** not Watts

Brightness of light is measured in Lumens (lm) **Look out for this on the box**

EXAMPLE: 1300 Lumens

Same Brightness  
1300 Lumens

Higher watts uses **more** electricity

Lower watts uses **less** electricity

### STEP 3 You have **new** options!

OLD ————— NEW

### STEP 4 Better **quality** lasts longer

### STEP 5 Quality bulbs **save** money

Annual cost = Price of bulb + Electricity

Uses More Energy

Uses Less Energy

### STEP 6 Choose Green Bulbs!

Green = Less Power Used

### STEP 7 Create your tone/mood

Soft tone/  
mood, e.g.  
for bedroom

Clear tone/  
mood, e.g.  
for kitchen

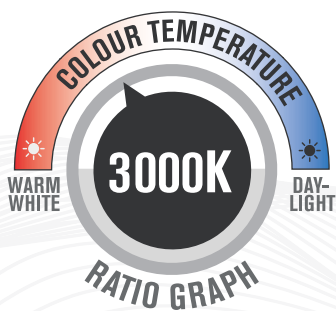

Measured in KELVINS

# HOW TO CHOOSE THE RIGHT COLOUR GLOBE

Comparing the wattage or lumens will help determine the brightness of the desired globe. Choosing between warm and cool lighting is also important based on the rooms they are meant for.

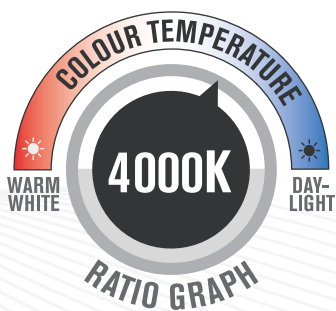

Globe colours are available in warm white, cool white and daylight. The wattage will indicate the energy consumption of the globe and the lumens will indicate the brightness of the globe.

Warm white is best suited for areas like the bedroom and the living room where it is ideal to relax. Cool white is recommended for kitchen and office use. Daylight is ideal for areas such as bathrooms and the garage.

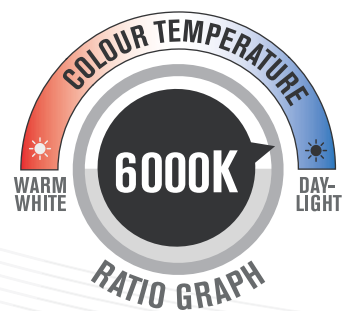

## WARM WHITE

Warm whites are perfect for bedrooms and living rooms as they are less harsh and create a relaxing ambience.

## COOL WHITE

Cool white is ideal for kitchen or homely settings. Providing enough light with a warmer feel.

## DAYLIGHT

Daylight is ideal for areas such as the bathroom and garage that require bright and white light.
